Continued Growth in Revenue and Key Financial Indicators Drives Path to Profitability

BOCA RATON, Fla.--(BUSINESS WIRE)--Mar. 7, 2019-- Red Violet, Inc. (NASDAQ:RDVT), a leading information solutions provider, today announced financial results for the quarter and full year ended December 31, 2018.

"2018 proved to be a transformative year for us, with strong financial performance including 90% year-over-year revenue growth and substantial progress towards profitability," stated Derek Dubner, red violet's CEO. "Our solutions are enabling our customers to grow their businesses, which in turn is resulting in increased spend with us. We are seeing greater new customer adoption across all verticals and the first two months of this year indicate that 2019 will be a monumental year for red violet. We are as confident as ever in our path to positive cash flow and profitability."

Use of Non-GAAP Financial Measures

Management evaluates the financial performance of our business on a variety of key indicators, including non-GAAP metrics of adjusted EBITDA, adjusted gross profit and adjusted gross margin. Adjusted EBITDA is a financial measure equal to net loss, the most directly comparable financial measure based on US GAAP, excluding interest income, net, depreciation and amortization, share-based compensation expense, litigation costs, insurance proceeds in relation to settled litigation, transition service income, and write-off of long-lived assets and others, as noted in the tables below. We define adjusted gross profit as revenue less cost of revenue (exclusive of depreciation and amortization), and adjusted gross margin as adjusted gross profit as a percentage of revenue.

We present adjusted EBITDA, adjusted gross profit and adjusted gross margin as supplemental measures of our operating performance because we believe they provide useful information to our investors as they eliminate the impact of certain items that we do not consider indicative of our cash operations and ongoing operating performance. In addition, we use them as an integral part of our internal reporting to measure the performance of our business, evaluate the performance of our senior management and measure the operating strength of our business.

Adjusted EBITDA, adjusted gross profit and adjusted gross margin are measures frequently used by securities analysts, investors and other interested parties in their evaluation of the operating performance of companies similar to ours and are indicators of the operational strength of our business. Adjusted EBITDA eliminates the uneven effect of considerable amounts of non-cash depreciation and amortization, share-based compensation expense and the impact of other items. Adjusted gross profit and adjusted gross margin are calculated by using cost of revenue (exclusive of depreciation and amortization).

Adjusted EBITDA, adjusted gross profit and adjusted gross margin are not intended to be performance measures that should be regarded as an alternative to, or more meaningful than, either loss before income taxes or net loss as indicators of operating performance or to cash flows from operating activities as a measure of liquidity. The way we measure adjusted EBITDA, adjusted gross profit and adjusted gross margin may not be comparable to similarly titled measures presented by other companies, and may not be identical to corresponding measures used in our various agreements.
